RECORDSAVE
GOVERNMENT RECORDS PRESERVATION

December 5, 2011

FOR IMMEDIATE RELEASE:

**THE HF GROUP IS PLEASED TO ANNOUNCE A NEW SERVICE AND DIVISION
DEDICATED TO GOVERNMENT RECORDS RESTORATION AND REFORMATTING**

CHESTERLAND, Ohio (December 5, 2011) – The HF Group (www.thehfgroup.com) headquartered in Chesterland, Ohio, with facilities in PA, NC, IN, and WA, announce the startup of a new division of the company. **RecordSave** (www.recordsave.com) is a new service directed towards County and Municipal Government records preservation.

RecordSave provides repair, restoration, reformatting and digital print reproductions of all types of government record books. While The HF Group has had some involvement in government records (primarily through its conservation services division, Etherington Conservation), RecordSave represents an expansion of the company's capacity, capabilities and range of services to this market.

“Our company has over 80 years of experience in handling, treating, repairing and reformatting materials for libraries, museums, special collections, and city and county agencies” stated Eric Fairfield, Vice President of The HF Group. *“Our background and experience in conservation treatment (Etherington Conservation Services \ www.etheringtoncs.com) and digitization (Digital Conversion Solutions \ www.digitalconversionsolutions.com) makes us uniquely qualified to increase our presence in the records market with specific knowledge of administrator's past and present needs.”*

RecordSave will primarily offer all physical treatment services from its facilities in **Browns Summit, NC** and **North Manchester, IN**. The division and its dedicated staff expect to work not only directly with government officials and buyers, but also with an established dealer network that has a strong history of serving the needs of these same government managers and officials.

For additional services information or to schedule a tour of our facilities in NC and IN, please contact:
